

Hwy 421 Water and Wastewater Project

New Hanover County and the Authority have partnered together on the Hwy 421 Water and Wastewater project. The project includes the installation of water and sewer based facilities along Hwy 421 to the Pender County line. The Authority has a construction contract with TA Loving Company. The projects construction duration is 18 months with the substantial completion of October 2019.

TA Loving is currently working on the installation of water and sewer utilities along the Highway 421 corridor. Currently 51,000 feet of water and sewer main have been installed, and construction of the three sewer pump stations is also under underway. Overall, this project worth \$12.8 million is about 70% complete.

If you have any questions regarding connecting to the water or sewer facilities along HWY 421 please contact Master Planning at the below web link.
