

Aesthetics Improvements at Pump Stations 34 and 35

Hewletts Creek Pump Station (Pump Station #34) is located along Pine Grove Drive just south of its intersection with Greenville Loop Road near Hewletts Creek. Bradley Creek Pump Station (Pump Station # 35) is located along Oleander Drive near the Bradley Creek bridge. Both stations are highly visible and in need of aesthetic improvements. Coastal Land Designs, LLC., designed improvements to blend more seamlessly with the surrounding areas. Proposed improvements include screening, painting, and additional landscaping features, as well as a paved parking area at Hewletts Creek Pump Station.
