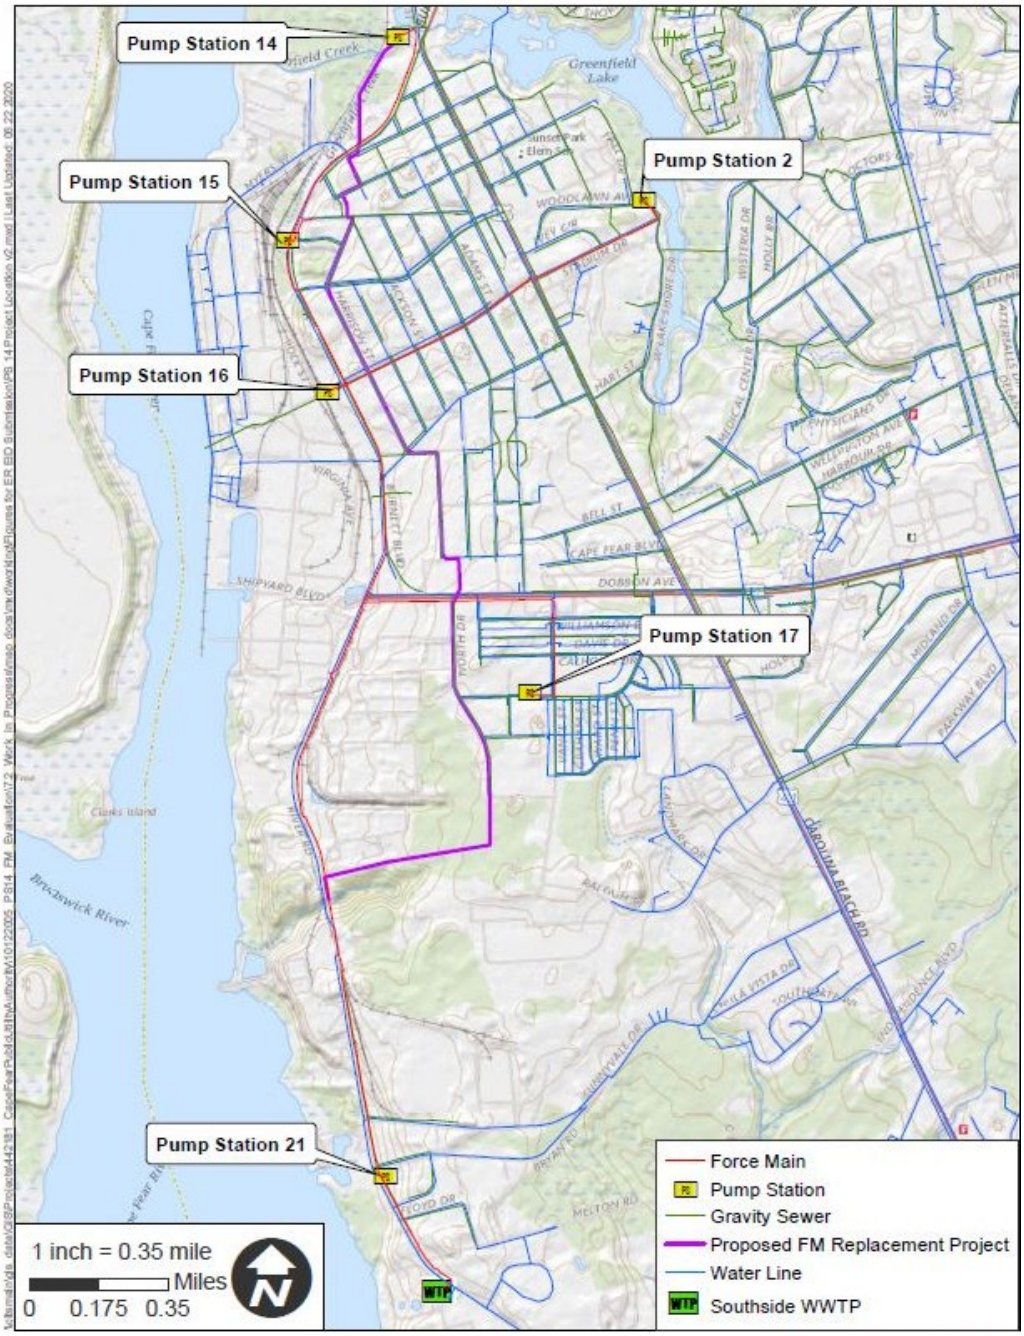
**Greenfield Lake Force Main Replacement**


The Greenfield Lake Force Main Replacement Project consists of constructing an approximately 2.6 mile 24" PVC sewer force main from the Greenfield Lake pump station to a tie in point on River Road just north of the Southside Wastewater Treatment Plant. This alignment runs roughly north-south through the Sunset Park neighborhood and NC State Ports Authority property. This project will replace the existing River Road force main which is nearing the end of its useful life and is funded through the NC Department of Environmental Quality (DEQ) Clean Water State Revolving Fund. Construction is expected to begin in July of 2022 and take approximately one year.
