

Downtown Alley Water and Sewer Rehabilitation/ Replacement Project

The Downtown Alley Water and Sewer Rehabilitation/ Replacement Project will rehabilitate or replace sewer mains and services in the alley ways along with the replacement of a small water main that is over 40 years in age. Brookwood Ave will have the sewer mains and services rehabilitated while the water main and services will be replaced.

This work will take place before the City of Wilmington completes resurfacing of the alleys and Brookwood Ave.

As of March 2022, the project is in the design phase.

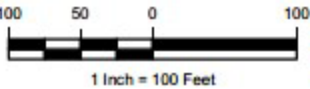

This data is from GIS sources. The accuracy can not be guaranteed and should not take the place of a field survey.
